TRIGONOMETRY

$\sin x + \cos x = 1$
$1 + \tan x = \sec x$
$1 + \cot x = \csc x$

$\sin(A+B) = \sin A \cos B + \cos A \sin B$
$\cos(A+B) = \cos A \cos B - \sin A \sin B$
$\tan(A+B) = (\tan A+\tan B)/(1-\tan A \tan B)$

$\sin(2A) = 2 \sin A \cos A$
$\cos(2A) = \cos A - \sin A$

Standard Values:

Law of Sines: $a/\sin A = b/\sin B = c/\sin C$
Law of Cosines: $c = a + b - 2ab \cos C$
