PROBABILITY & STATISTICS

1. PROBABILITY
P(A) = favorable/total
P(A') = 1 - P(A)

Bayes: P(A|B) = P(B|A)P(A)/P(B)

2. RANDOM VARIABLES

Var(X) = E(X) - [E(X)]

3. DISTRIBUTIONS
Binomial: C(n,k)p^k(1-p)^(n-k)
Mean=np, Var=np(1-p)

Normal: 68-95-99.7 rule

4. HYPOTHESIS

5. REGRESSION
y = a + bx
