C PROGRAMMING

1. BASICS
#include <stdio.h>
int main() {
printf("Hello\n");
return 0;
}

2. TYPES
int, float, double, char
unsigned, long

3. CONTROL
if/else, switch
for, while, do-while

4. FUNCTIONS
return_type name(params) {
return value;
}
Prototypes

5. ARRAYS
int a[10];
Multi-dimensional

6. POINTERS
int *p = &x;
*p = 10;
Pointer arithmetic

7. STRINGS
char s[] = "hello";
strlen, strcpy, strcmp

8. STRUCTURES
struct Point {
int x, y;
};
typedef

9. MEMORY
malloc, calloc, realloc, free
Stack vs Heap

10. FILE I/O
FILE *f = fopen("a.txt", "r");
fscanf, fprintf
fclose
