Critical Thinking

Subject: General | NoteShare Library

CRITICAL THINKING

1. LOGIC
Premises -> Conclusion
Deductive: general -> specific
Inductive: specific -> general
Validity vs Soundness

2. FALLACIES
Ad hominem: attack person
Straw man: misrepresent
False dilemma: only 2 options
Slippery slope: chain of events
Appeal to authority
Bandwagon
Circular reasoning
Hasty generalization

3. ARGUMENTS
Claim, Evidence, Reasoning
Counter-arguments
Rebuttals

4. EVIDENCE
Primary vs Secondary
Reliable sources
Peer-reviewed
Bias, Sample size

5. COGNITIVE BIASES
Confirmation bias
Anchoring
Availability heuristic
Hindsight bias
Dunning-Kruger

6. DECISION MAKING
Pros/Cons
Cost-benefit
Expected value
Sunk cost fallacy
Opportunity cost

7. PROBLEM SOLVING
Define problem
Generate options
Evaluate
Choose
Implement
Review
